Continuation of 11. does NOT place the application in condition for allowance because: Applicant's argument stated as "it is respectfully submitted that claims 12-14 are directed to statutory subject matter and do not fall into any of the exclusions encompassed by 35 U.S.C. 101." In response to Applicant's argument, Examiner respectfully disagrees, because, there is no physical device like a processor and a storage is not incorporated in claims 12-14. These claims are Descriptive material and can be characterized as either "functional descriptive material" or "nonfunctional descriptive material." Therefore these claims deal with non-statutory subject matter.

Applicant's argument stated as "Applicant respectfully notes that Schwarz has improperly been combined with Nakagawa and the IBM disclosure." In response to applicant's argument that Schwarz is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See In re Oetiker, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Schwarz teaches using a central server connected to several clients and every client will have their processor and software to print (see Fig. 9, col. 6, lines 42-46). Therefore Schwarz is analogous the claims.
